DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heermans (4,418,637) in view of Hubbard (2,536,369) and further in view of Hole (1,502,637).

Heermans disclose, in figs. 1 and 2, a lid assembly for cookware comprising a lid having a top 10 with a handle 50, the handle form a central threaded longitudinal hole 36 and securing to the lid a by a retainer 20 with external threads when pressurized air and water vapor pass thought the hole, a whistling sound is produced, and a movable slide 62 in the handle forming a hole 65.

Heermans does not disclose the lid assembly comprising a removal flexible band extending around a flange of the lid.

Hubbard teaches a cookware lid having a flexible band 26 extending around a flange of the lid, and Hole teaches a flexible band removably extending round a flange of a cookware lid.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the Heermans lid with a removal

flexible band extending around a flange of the lid, as taught by Hubbard and Hole, in order to enhance the sealing of the lid with the cookware.
